Technical Skills Python, R, Data Visualization, Java

Soft Skills Teamwork, Adaptability, Time Management, Networking

PROJECTS

Apartment Management System. Built a user-friendly application that manages apartment listings, tenant details, and maintenance requests by using HTML, CSS, JavaScript, and Bootstrap, with Google Sheets API serving as the backend. ([Project Repo](#))

Smart Router. The Smart Router provides secure VPN, ad-blocking, network access control, firewall capabilities, and logging for enhanced security and privacy, utilizing tools such as PiHole, Grafana, OpenCanary, Synctrazor, Tailscale, and OpenVPN.

Smart Home Control. The Smart Router prioritizes user comfort by adjusting the fan or AC based on presence and ambient temperature and can also function as an intruder alert system using motion sensors.

EXTRA-CURRICULAR ACTIVITIES

- **Open Source Contributor:** Actively test and track bugs in GitHub projects, providing detailed issue reports and suggestions for feature enhancements to improve project quality and functionality.
- **State Level Silver Medalist in Taekwondo:** State Level Silver Medalist in Taekwondo with demonstrated expertise in competitive martial arts. Achieved top placement in a highly competitive field.
